***Detailed Action***

1. **Claims 1, 3, 5-35, 37, 39-68 are allowed**, claims 1 and 35 have been amended, and claims 2, 4, 36, and 38 have been canceled.

***Allowable Subject Matter***

2. **Claims 1, 3, 5-35, 37, 39-68 are allowed.** The following is an examiner's statement of reasons for allowance: none of the references either singularly or in combination teach or fairly suggests that a bistable nematic liquid crystal having two textures, one texture being uniform or lightly twisted in which the molecules are at least substantially parallel to one another, and the other texture differing from the first by a twist of the order of  $\pm 180^\circ$  wherein breaking the anchoring to switch from a first texture to a second texture differing from the first by a twist of the order of  $\pm 180^\circ$  nor that the duration of the column signal be less than the row addressing time.

The reference of record, Tanaka creates breaking of anchoring wherein both first and second textures of a bistable nematic liquid crystal have the same orientation to the surface and that the duration of the column and row driving signals are the same. Tanaka does not teach two textures of a bistable nematic liquid crystal having different orientations by  $\pm 180^\circ$  nor wherein the column signal is less than the row signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
